

Tutorial Task (Git)

Tasks

Note that most of the tutorials will have a task at the end that will engage you into the learning material for the course. Make sure you attempt these questions in the tutorial and discuss them with your tutor in the end.

1. If you refer to the cheat sheet, you can run other aspects of git config commands. Browse through the git config command list and try them out. Find out what the command to set a shortcut for “git commit” command as “git cmt”.

Show your tutor the command that does this.

2. Two developers make changes in two different branches on the same file. They then merge the branches. Discuss with your tutor what would happen in this case when the two branches are merged.
